## About Me

AI/ML engineer passionate about building intelligent systems that solve real-world problems. I have hands-on experience designing and deploying end-to-end solutions such as semantic search engines, AI-powered music recommendation platforms, and predictive analytics pipelines. Skilled in machine learning, deep learning, NLP, vector search, and production-ready deployment, I focus on combining advanced AI techniques with scalable, efficient system design. I thrive on turning complex data into actionable insights and creating AI systems that deliver measurable impact.

## Skills

- Machine Learning: Regression, Classification, Clustering, Ensemble Models
- Deep Learning: CNN, RNN, LSTM, Transformers
- NLP: Embeddings, Sentiment Analysis, Summarization, NER
- Recommendation & Vector Search: Content-based, Collaborative, Hybrid, FAISS/Chroma
- Data Processing & Modeling: Feature Engineering, Dimensionality Reduction, Evaluation Metrics
- Tools & Deployment: Python, Scikit-learn, PyTorch, TensorFlow, Streamlit, FastAPI, SQL, MongoDB, Docker

## Achievements

- Best Academic Performance 2023
- Best project Award 2025
- SIH Finalist - 2023
- MSME Ideathon 4.0 Winner

## Certifications

- Machine Learning - UCL
- Deep learning with NLP - Swayam
- McKinsey Forward Program

# MRITYUNJYA S

AI ENGINEER

## Projects

### Harmonix – AI-Powered Music Intelligence Platform

- Built an AI-powered music platform analyzing audio features and lyrics to generate personalized song recommendations.
- Developed an interactive Streamlit demo visualizing real-time recommendations and audio feature insights.
- Implemented hybrid recommendation logic and evaluated relevance using similarity scores and user feedback, demonstrating end-to-end ML workflow.

### NeuroSearch — Personalized Semantic Search Engine

- Built a semantic search engine using vector embeddings and a vector database for meaning-based retrieval over unstructured documents.
- Implemented similarity search with a re-ranking stage to improve relevance and retrieval precision.
- Added a personalization layer using user memory vectors and exposed the system through an interactive UI and API.

## Experience

Lead AI Developer

2024–Present

EDORAS

- Built and deployed end-to-end AI/ML pipelines from data processing to production APIs.
- Developed ML/DL models for recommendation, NLP, and predictive use cases.
- Exposed models via FastAPI and deployed using Docker.

AI Intern

07/2025 – 08/2025

OutriX

- Assisted in developing machine learning models for structured and unstructured data, including data cleaning, feature engineering, and model evaluation.
- Implemented NLP techniques such as embeddings and similarity scoring to enhance content understanding and retrieval.
- Built experimentation pipelines to compare model performance using standard evaluation metrics.

AI ML Intern

06/2025 – 07/2025

Octin Technology

- Worked on end-to-end ML workflows, from dataset preparation to model training and validation.
- Implemented classical ML algorithms and deep learning models for predictive and analytical tasks.
- Developed prototype applications and dashboards using Streamlit to visualize model outputs and insights.

## Education

- B.E. Computer Science & Engineering
- 2022 – 2026
- Jaya Engineering College (Affiliated to Anna University)
- CGPA :- 8.97/10
